Innovation *in surfaces*

**KITCHENS - COUNTERTOPS- BBQ STONE
GRANITE - MARBLE - NEOLITH - DEKTON - QUARTZ**

PRODUCT PORTFOLIO

We are a multi-brand company, which allows us to have a wide portfolio for our customers, with the latest trends in materials, support from international brands, and products of excellent quality. We supply, transform, and install natural stones, marbles, granites, slates, sandstones, quartzites, ceramic tiles and porcelain tiles.

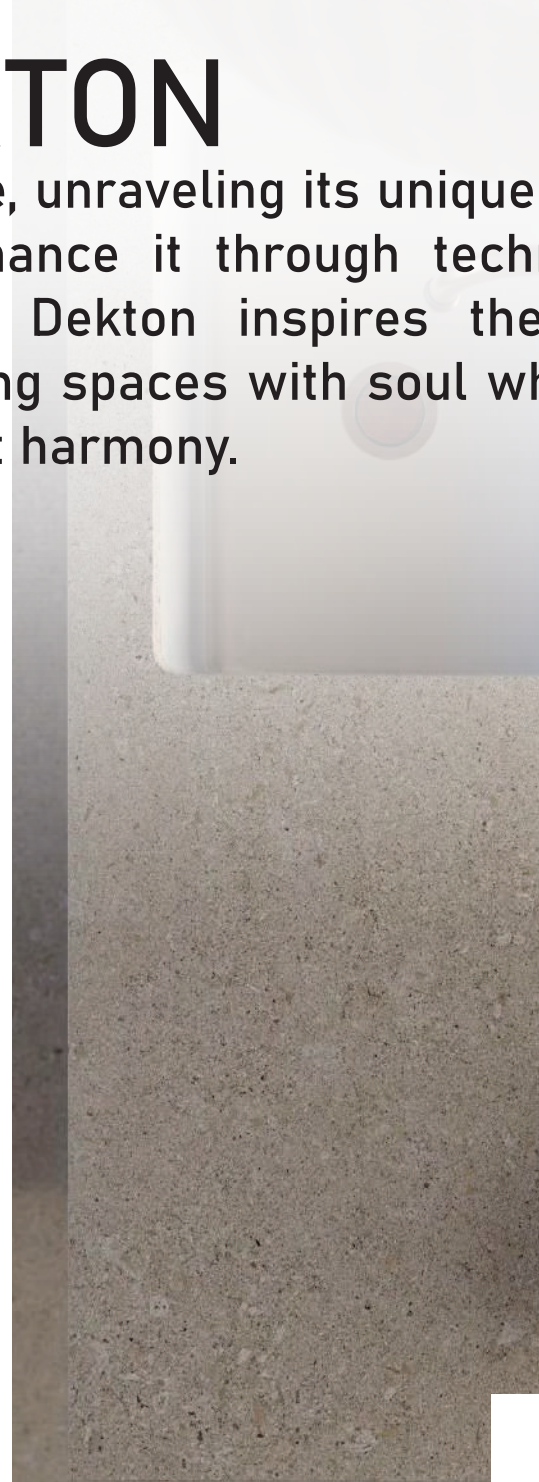

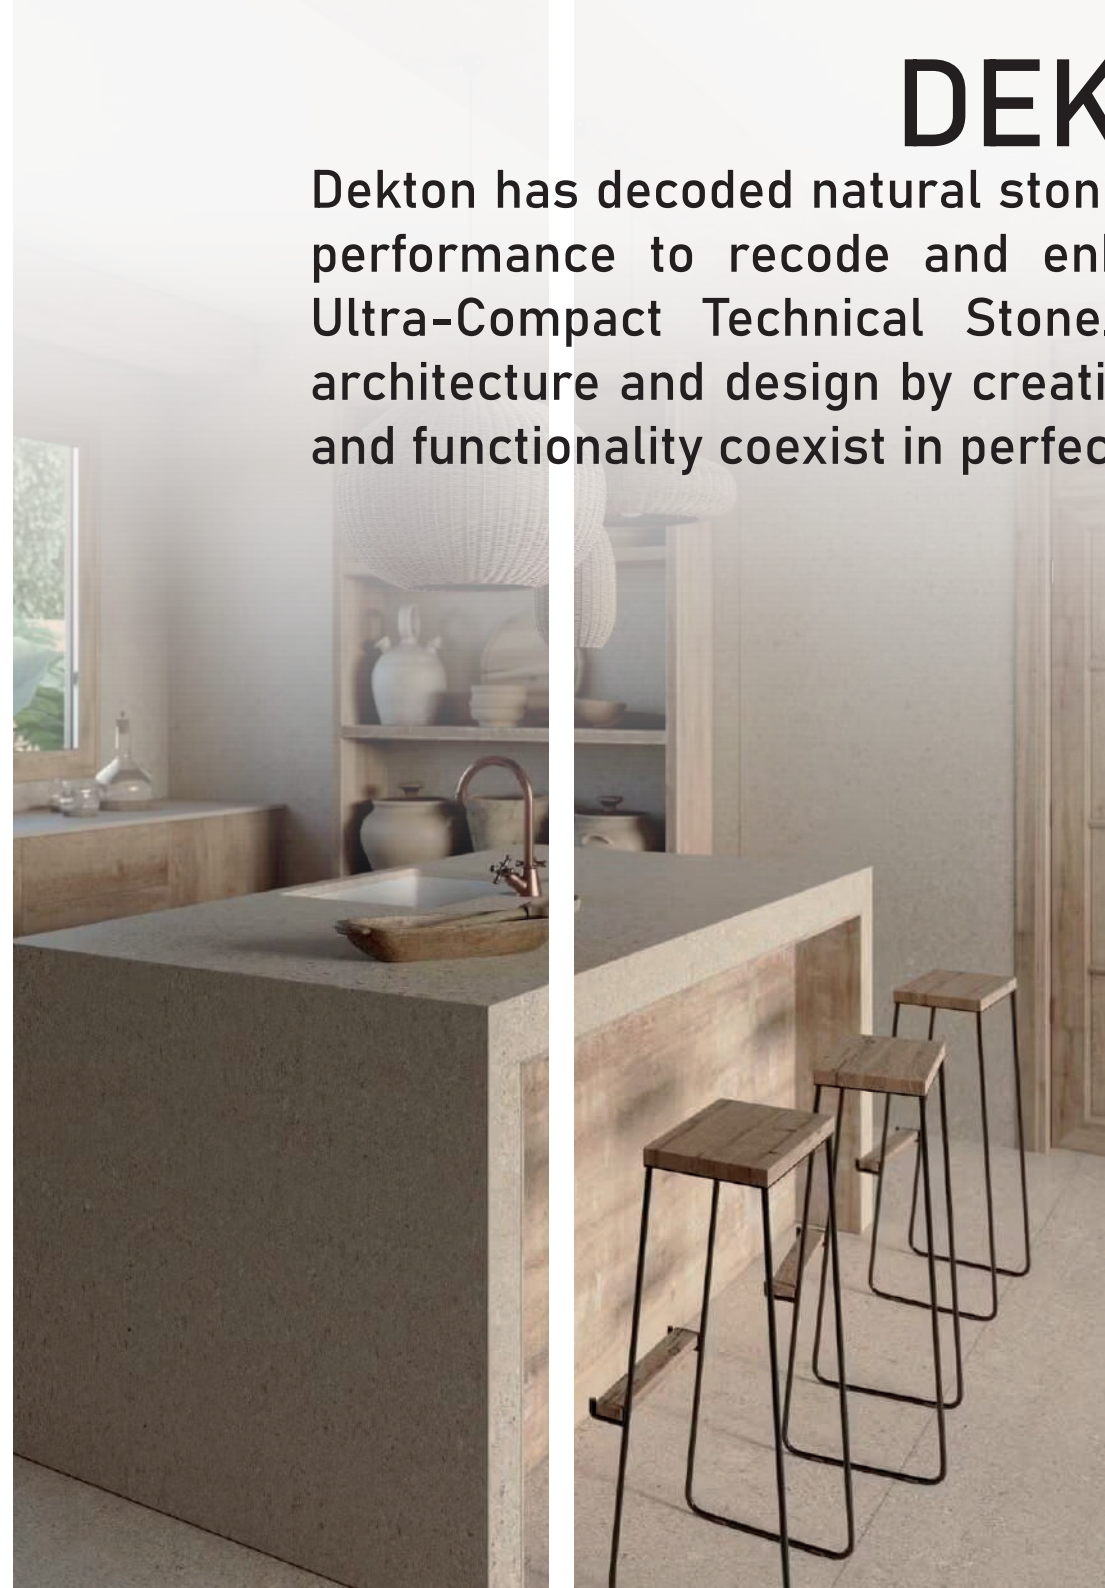

We supply, transform, and install architectural surfaces from the main international brands marketed in the country, such as Neolith, Dekton, Laminam, Techlam, Lapitec, Inalco, Gramarstone, Altea, Infinity, Rac, Silestone, and Quartzstone, among others

DEKTON,
Ultra compact surface

DEKTON

Dekton has decoded natural stone, unraveling its unique beauty and performance to recode and enhance it through technology into Ultra-Compact Technical Stone. Dekton inspires the future of architecture and design by creating spaces with soul where beauty and functionality coexist in perfect harmony.

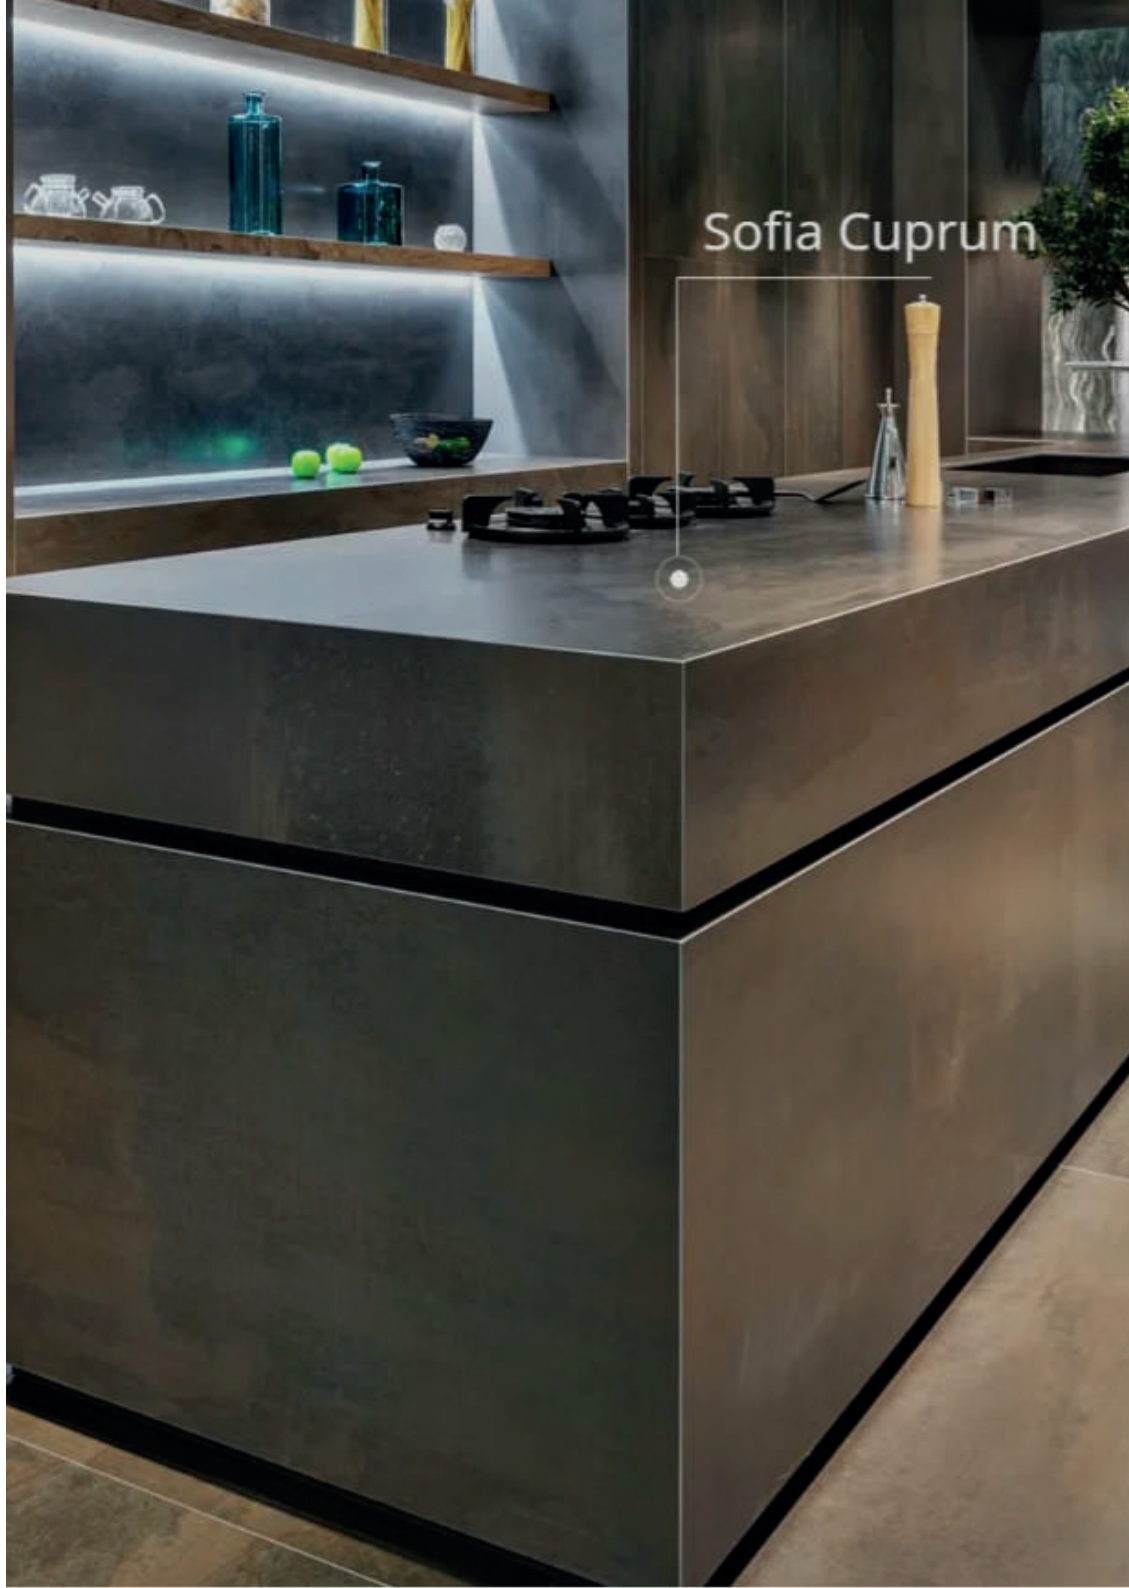

NEOLITH

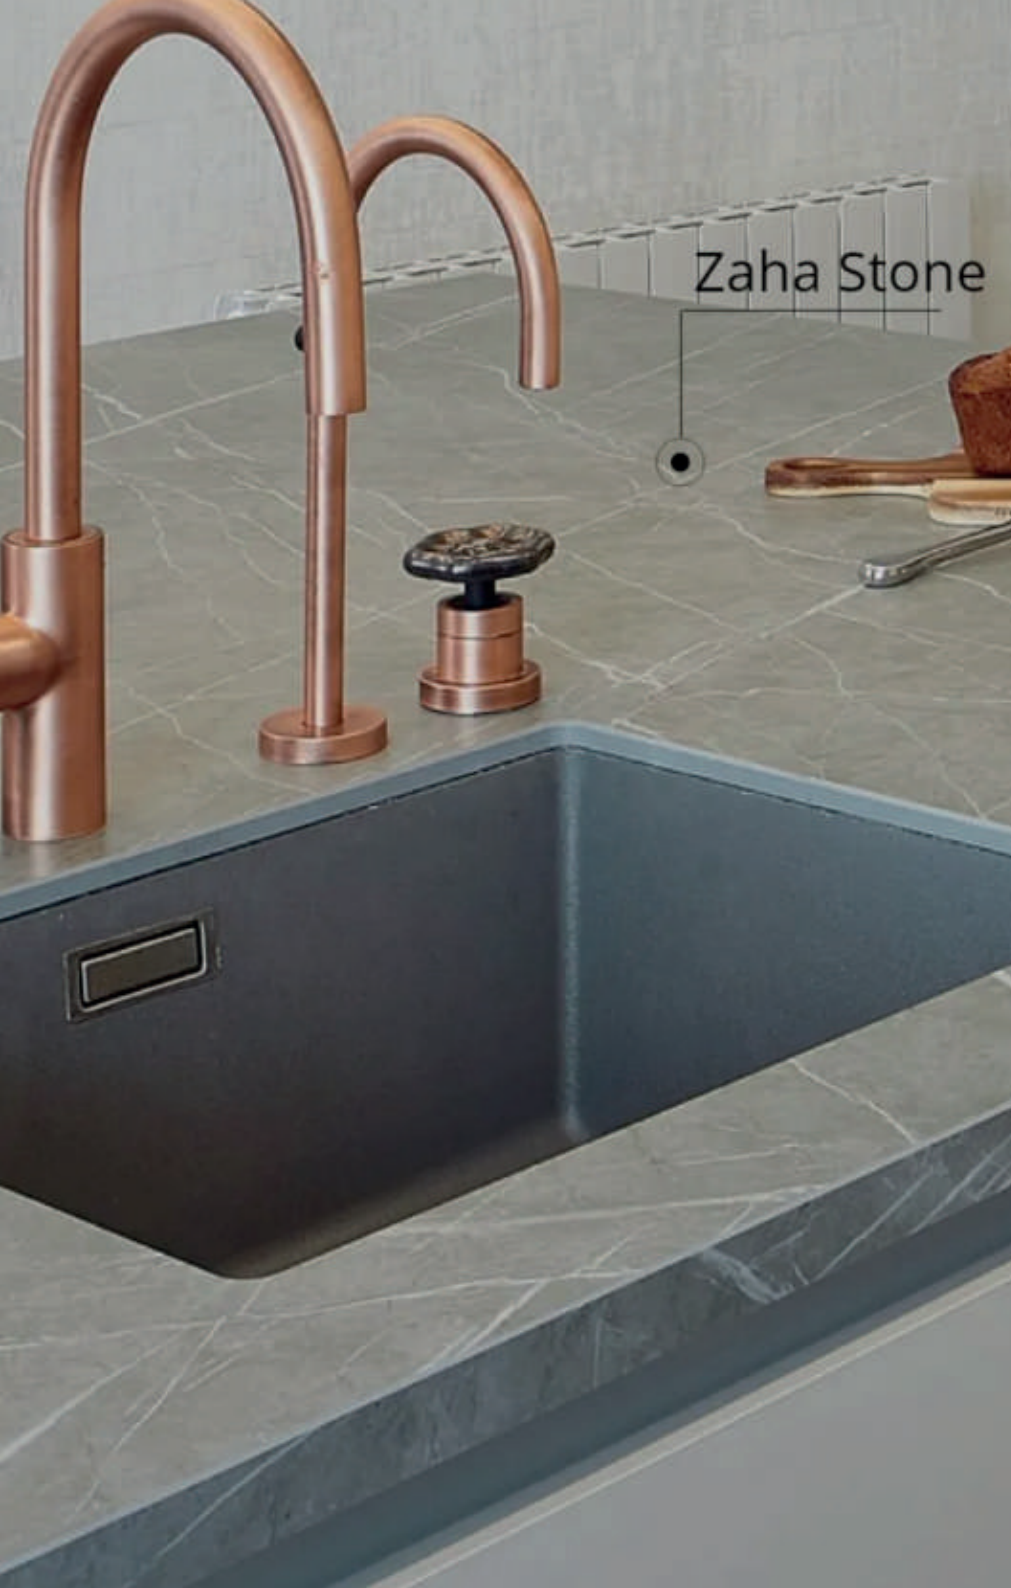

Neolith is a Sintered Stone that is part of a revolutionary product category, designed to meet the most demanding architectural and design needs.

Neolith is a pioneer in the Sintered Stone industry, and its technical characteristics make it a very versatile, elegant, and resistant material that undoubtedly offers endless possibilities.

NEOLITH

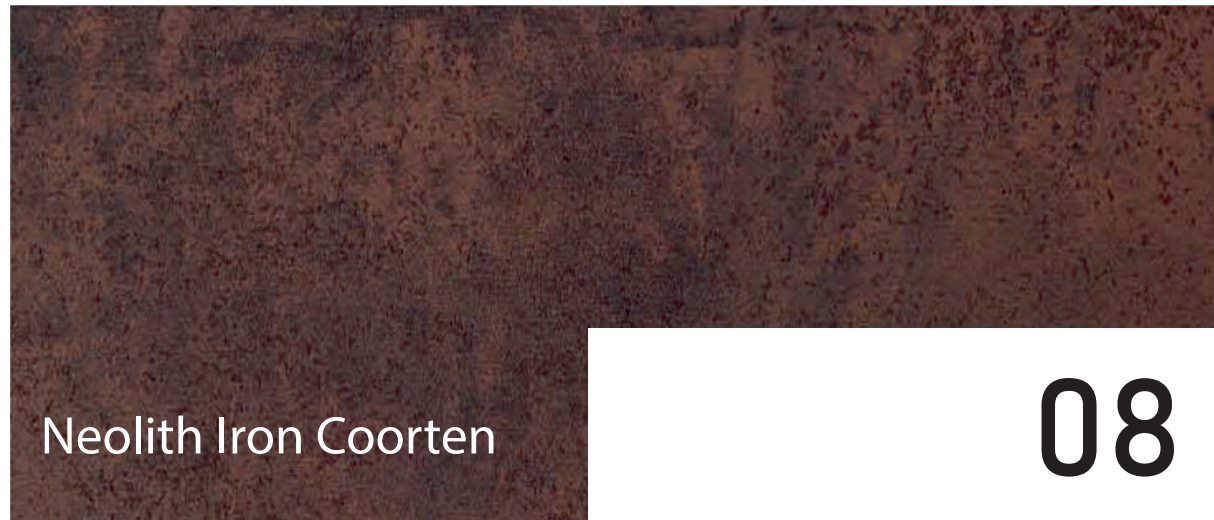

Zaha Stone

Neolith Just White Silk

Neolith Zaha Stone Silk

Neolith Iron Coorten

Laminam is evolution, innovation, invention, to create large-sized and thin sintered stone surfaces, with high technical and aesthetic performance, primarily used in the traditional and advanced architecture sectors.

LAMINAM

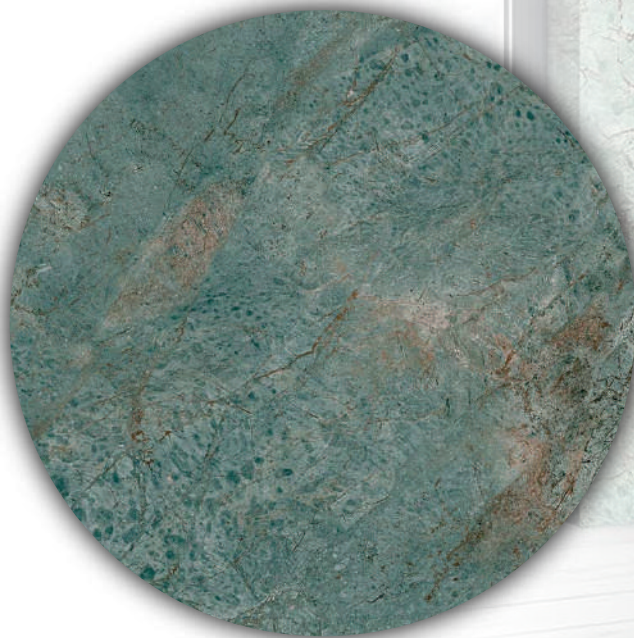

INALCO

Mineral Design Innovation is high-value added surfaces that make correct use of natural resources, offering unique and distinguished surfaces for the architecture, fashion, furniture, and interior design sectors. MDi surfaces are exceptional with total aesthetic continuity of 360°.

TECHLAM

It is the high-end sintered stone brand of Levantina Group, synonymous with sustainability, unlimited possibilities, know-how, innovation, cutting-edge technology, and all the quality that comes from the most advanced technology. It is versatile, waterproof, and resistant to liquids. Easy to clean, with color that does not fade. Resistant to heat, chemicals, bending, high traffic, and abrasion. Additionally, it is a 100% natural and recyclable stone.

ALTEA

Altea is a revolutionary product with an affordable price that has become a material of choice for architects, designers, specifiers, and manufacturers. It is a sintered stone composed of 100% natural minerals, derived from granite, quartz, and feldspar, which provide hardness and physical resistance, glass minerals, silica, ensuring chemical stability, and natural oxides that contribute to its chromatic properties.

INFINITY

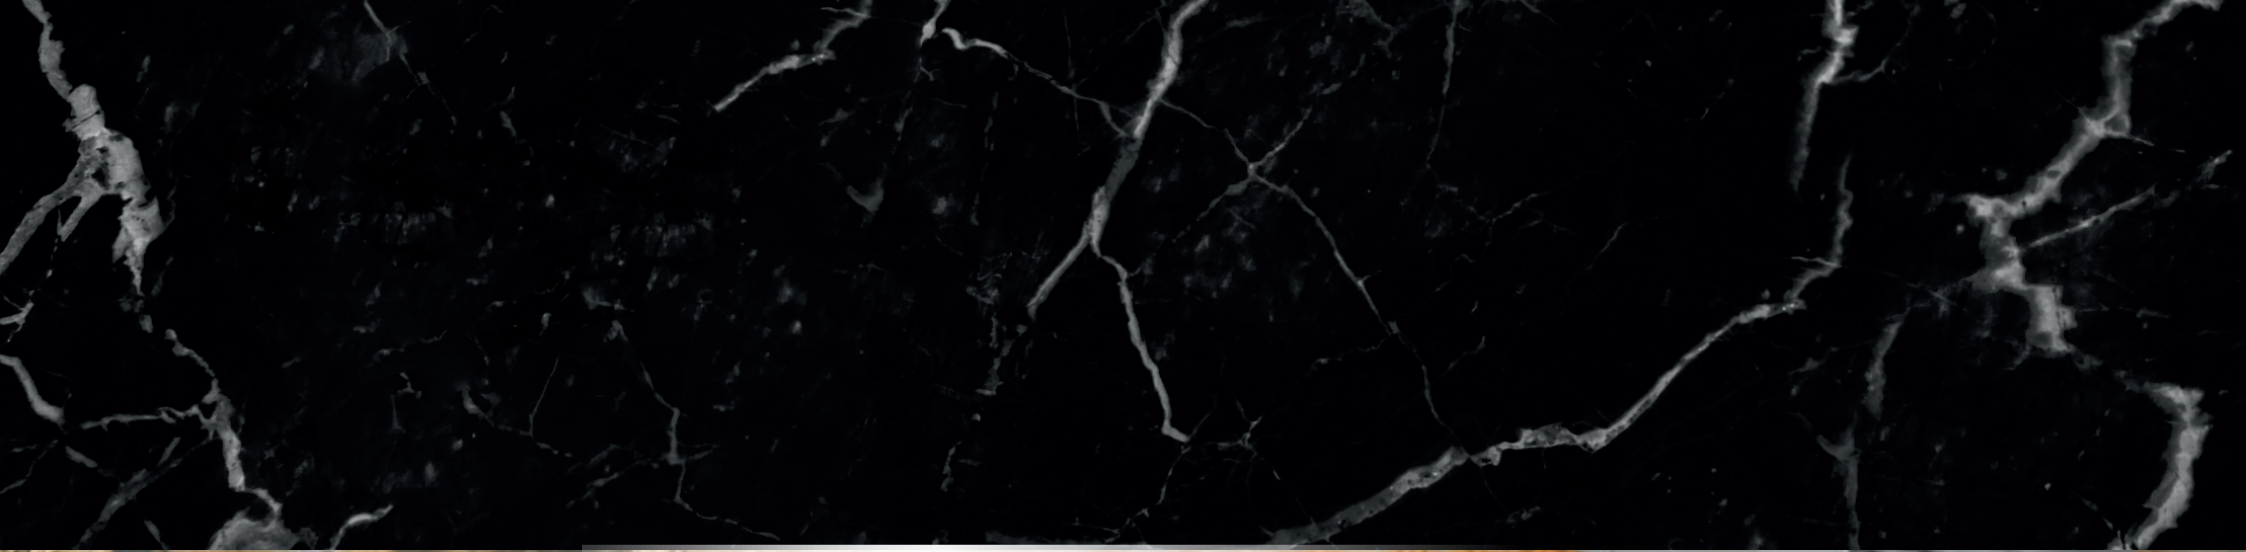

It is a sintered stone with numerous uses in the construction industry. Its versatility allows it to be used in interior and exterior cladding, kitchen surfaces, furniture, bathroom cladding, ventilated facades, pools, BBQs. Infinity is composed of high-quality natural materials such as clay, feldspar, silicon, and mineral oxides, compacted through a process in which the particles bond perfectly, without using resins or chemical binders.

Natural Stones

MARBLE

Marble has long been a symbol of distinction and a synonym for luxury and grandeur. Marble is a natural stone, metamorphic limestone, with a compact and crystalline texture. Depending on the country of origin and the minerals present, it can have different tones, veins, and grain sizes.

An aerial photograph of a mountain range, showing distinct horizontal layers of rock strata. The layers vary in color from light tan to dark grey, indicating different geological periods. The terrain is rugged with some small structures and roads visible on the slopes.

Natural Stones

GRANITE

Granite is a plutonic igneous rock with a granular texture, composed primarily of feldspar and quartz. It is a stone that possesses unique qualities, with high hardness and scratch resistance. It also has high resistance to acids, heat, compression, and bending. Additionally, it is durable over time.

SANTA CECILIA

NEGRO ABSOLUTO

MAGMA

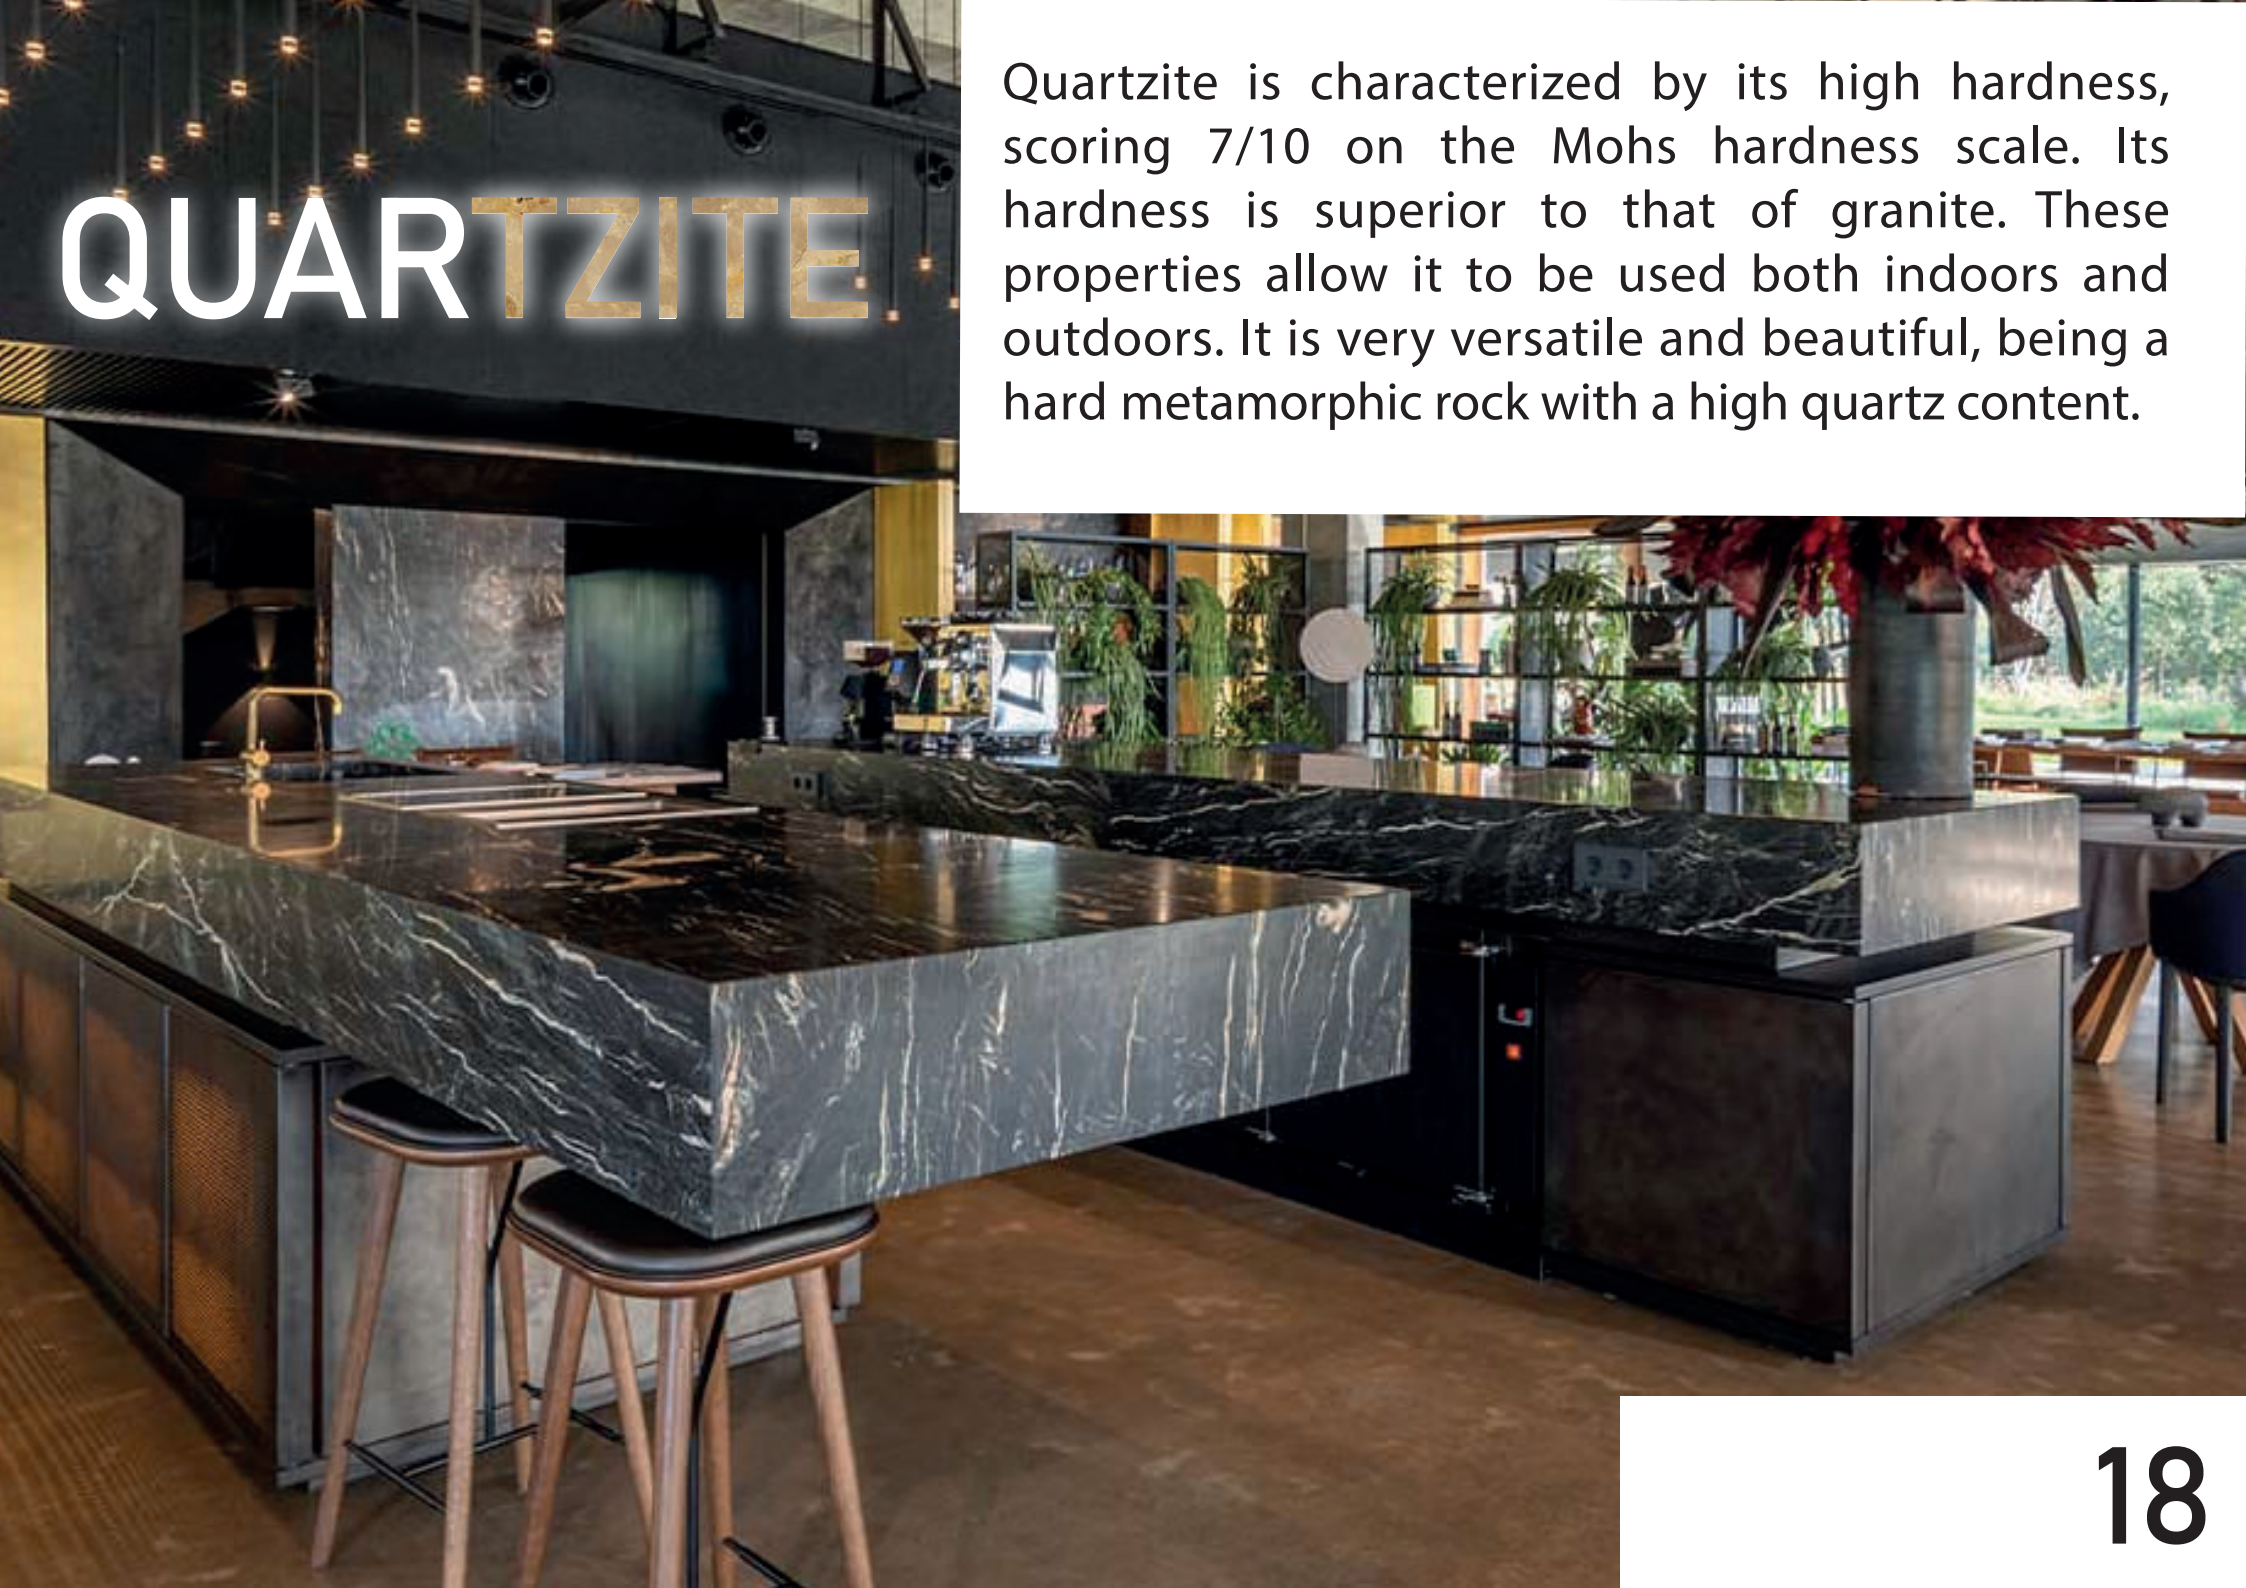

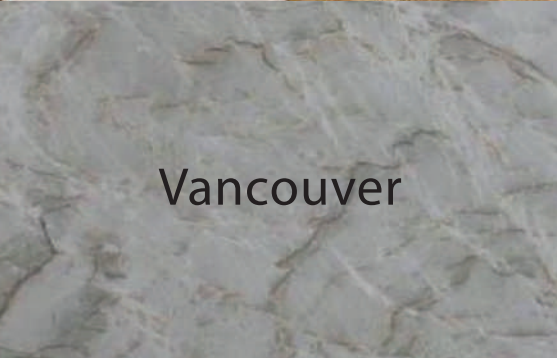

GRANITO LABRADOR

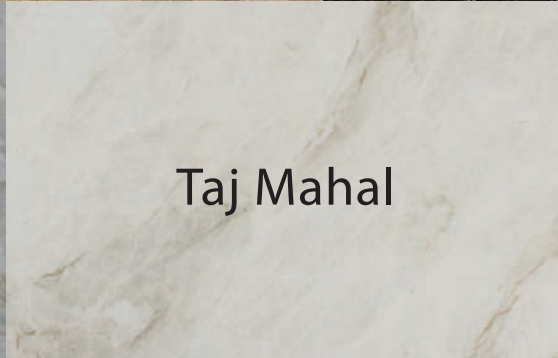

QUARTZITE

Quartzite is characterized by its high hardness, scoring 7/10 on the Mohs hardness scale. Its hardness is superior to that of granite. These properties allow it to be used both indoors and outdoors. It is very versatile and beautiful, being a hard metamorphic rock with a high quartz content.
